

**At Holy Trinity we  
know that Science is  
going well when...**

**We work together and  
discuss our ideas**

**We use equipment and  
resources**

**We investigate and  
explore the environment**

**We follow our interests**

**We make links to our  
other learning**

Through our science curriculum we aim to help our children love learning, experience the joy of discovery and develop respect for themselves and the world around them,
